VERANDA BAY
HOMES

(386) 986-2411 | www.verandabayhomes.com

Developer Ken Belshe and Architect Jim Albano partnered to offer a fifth option in Veranda Bay's Premier Builder Program. Veranda Bay Homes was built by two people, one vision: luxury coastal contemporary homes designed exclusively for Veranda Bay. Homes built to keep adding value to the neighborhood for many decades to come. No sales script, no pass-off, no big corporate design center. Your first meeting is with the people who'll design and build your home. Tell us where you are — comparing plans, choosing a homesite, or holding drawings you'd like a second opinion on.

"Custom" home building often means something different than what we offer. To us, custom means an architect asks what *you* want, then he draws it and builds it. That's what we do.

Bring a sketch, a saved folder of photos, or nothing but a list of everything your last house got wrong. We'll draw it, price it honestly, refine it with you, and build it — the same team from the first meeting to the last punch item. Our concierge building experience is created to provide a seamless experience for the discerning lot owners desiring of a true custom home building experience.
