

MANITOU CONNECTED MACHINES: smart machines guided by your requirements!

Real-time access to machine data

- Location
- Machine health
- Fuel & energy consumption
- Machine and engine alerts for 24/7 remote monitoring

📍 Total control over your machine

Geolocation, geofencing, hours of use, etc. You are in charge of defining when and where your machine can be operated. If it is stolen or used without authorisation, you are notified immediately.

Track and trace your machine!

📅 Your warranty extended to two years

By agreeing to share your machine data, you will enjoy better service and your manufacturer warranty will be extended to two years (or 2,000 hours).

Machines are covered for even longer!

Remote monitoring for better service levels

- Proactive, remote monitoring
- Advice from trained and certified professionals
- Anticipation of spare parts needed
- Error code notifications

🔧 Anticipative maintenance

By accessing machine data, our technicians can anticipate routine maintenance operations and repairs with the needed parts, meaning issues are resolved quicker for win-win benefits.

Reduction of the total cost of ownership (TCO)

⏱️ Reduced downtime

By anticipating the maintenance operations that need to be performed, your machine is serviced at the most suitable time. The risk of unexpected breakdowns and downtime are substantially reduced.

Maximum productivity guaranteed!

Usage, service scheduling and maintenance data on my mobile app

my MANITOU

- Your personal assistant
- Dedicated mobile application
- Customisable interface
- Quick access to your information

📊 All your machine data

Location, alerts, fuel consumption, etc. By knowing your machine better, you can optimise how it is used and driven, improving financial and logistics management. Save time and enjoy a greater peace of mind!

Efficient service scheduling!

📈 A general overview

Monitoring of machine events enables you to implement corrective actions and optimise your driving whilst also helping you understand your total cost of ownership. If the machine is sold, you can pass on its "ID card" to the new owner as a gesture of transparency.

Higher return on investment!

Customer relationship and business performance

- A brand that listens to your needs
- Support from experts at all times
- Data that is useful for working in complete safety and for improving the next generation of machines.

👥 A relationship that goes beyond expectations

With the network of Manitou partners by your side, you can work in complete confidence and count on support and practical help at any moment.

A comprehensive organisation at your service!

👨‍🔧 Even more expert advice

With smart connected machines, the benefits of our advice are measurable: improved response times, reduced resolution times and increased rate of first time fixes.

The entire Manitou network is behind you!
