

MANITOU CONNECTED MACHINES: smart machines guided by your requirements!

Real-time access to machine data

- Location
- Machine health
- Fuel & energy consumption
- Machine and engine alerts for 24/7 remote monitoring

📶 Total control over your machine

Geolocation, geofencing, hours of use, etc. You are in charge of defining when and where your machine can be operated. If it is stolen or used without authorisation, you are notified immediately.

Track and trace your machine!

📶 Multibrand fleet management

By setting an Application Programming Interface (API) solution integrated with our system, fleet managers will benefit from technological help to manage their multibrand fleet into one single tool.

Save time by automating manual tasks!

Remote monitoring for better service levels

- Proactive, remote monitoring
- Advice from trained and certified professionals
- Anticipation of spare parts needed
- Error code notifications

📶 Anticipative maintenance

By accessing machine data, technicians can anticipate periodic maintenance operations and repairs with the needed parts, preventing breakdowns and failures.

Reduction of the total cost of ownership (TCO)

📶 Reduced downtime

By anticipating the maintenance operations that need to be performed, your machines are serviced at the most suitable time. The risk of unexpected breakdowns and downtime are substantially reduced.

Maximum productivity guaranteed!

Usage, service scheduling and maintenance data on my mobile app

- Your personal assistant
- Dedicated mobile application
- Quick access to machine information
- Decision making helper

📶 All your fleet data

Location, alerts, fuel consumption, etc. By monitoring your fleet, you can optimise how it is used and driven, improving financial and logistics management. Save time and make the most of your assets!

Efficient service scheduling!

📶 A general overview

Monitoring of machine events enables you to anticipate corrective actions, better manage staff assignments and stock management of parts.

Improved service levels!

Customer relationship and business performance

- A brand that listens to your needs
- Support from experts at all times
- Data that is useful for working in complete safety and for improving the next generation of machines.

📶 A relationship that goes beyond expectations

With the network of Manitou partners by your side, you can work in complete confidence and count on support and practical help at any moment.

A comprehensive organisation at your service!

📶 Even more expert advice

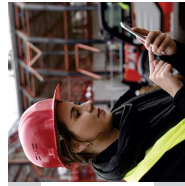

With smart connected machines, the benefits are multiple and measurable: improved response times, reduced resolution times and increased rate of first time fixes.

The entire Manitou network is behind you!

Better control

Greater management

« Your Manitou connected machine: the perfect partner for simplifying everyday life and improving performance! »

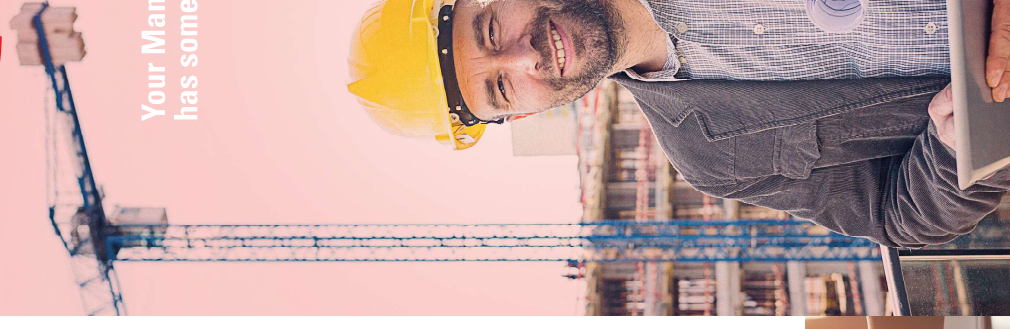

Higher performance

REVOLUTION 4.0

Connected Machine

Your Manitou has something extra!

MANITOU
HANDLING YOUR WORLD

MANITOU CONNECTED MACHINE

All your information at your fingertips!

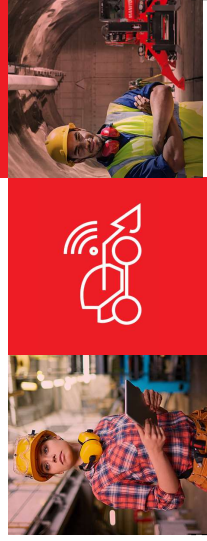

Easy MANAGER
Powered by Trackunit

All your data and so much more!

Ergonomic, secure and easy to use, with Easy Manager you have real-time access to all your machines technical information. At a glance, you can view its fuel consumption, movements, operating times, key indicators, upcoming maintenance operations, your warranty, etc. You can also secure your machine with an access control keypad, limiting access to certified operators with a RFID badge or via a given code. Safety comes first!

Easy MANAGER

Even simpler
