

Supporting NHS healthcare professionals with essential knowledge since 1949

We are committed to supporting healthcare professionals working in the NHS with easy access to essential resources, to help them quickly and confidently make the most informed decisions on the safe and effective use of medicines.

Much of the NHS has direct access to essential resources through our online platform MedicinesComplete. Referred to daily by primary and secondary care professionals and trusted to assist their research and clinical decision-making.

To discuss the most cost-effective subscription package to meet your organisational* needs, email our Sales team on pharmpress-support@rpharms.com

Essential resources for quick and confident decision-making at the point of care include:

Stockley's Drug Interactions & Stockley's Interactions Checker

Decide the best course of action quickly and reliably when managing drug interactions.

The screenshot shows the MedicinesComplete interface with a search for 'paracetamol' yielding 120 results. Two interaction results are visible:

Drug 1	Drug 2	Explanation	Action
lenalidomide systemic	paracetamol systemic	Lenalidomide is hepatotoxic. The MHRA in the UK states that this might be additive with other hepatotoxic drugs; they name paracetamol.	The MHRA in the UK recommends monitoring liver function on concurrent use.
lomitapide systemic	paracetamol systemic	Both lomitapide and paracetamol can cause hepatotoxicity; this might be additive on concurrent use.	Consider more frequent monitoring of liver function tests on concurrent use.

Martindale: The Complete Drug Reference

Quickly understand the characteristics of drugs and other pharmaceutical substances and their clinical uses.

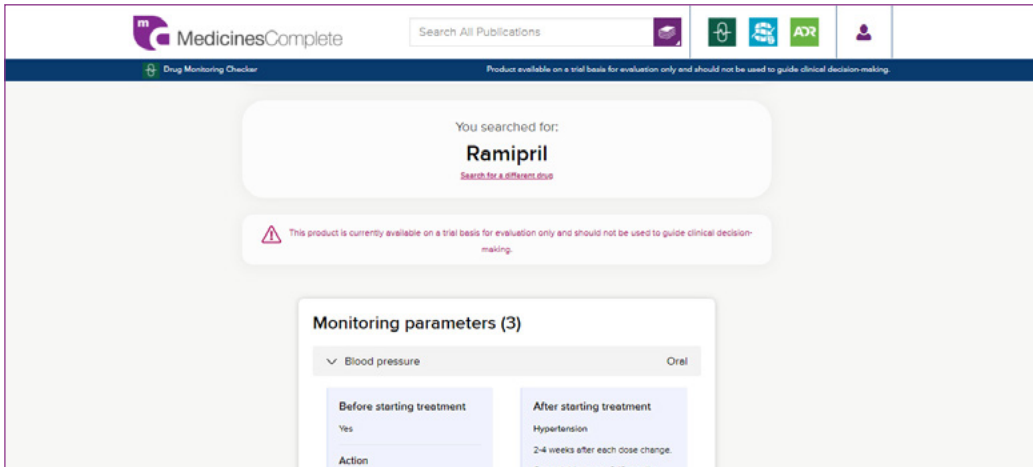

Martindale's ADR Checker

Concise clinical management advice with a severity flag system to support you when managing patients with adverse drug reactions.

Drug Monitoring Checker

Authored in collaboration with external experts, Drug Monitoring Checker provides clear, concise, and actionable advice before, during and after treatment.

Critical Illness

Essential medicines information to support complex decision-making and dynamic prescribing in critical care.

Palliative Care Formulary

Unrivalled and expert drug information for health professionals when caring for adult patients facing progressive life-limiting diseases.

Injectable Drugs Guide

Confidently and safely prescribe, administer and monitor injectable medicines.

Drugs in pregnancy and lactation

The information you need to confidently prescribe and care for a patient during pregnancy and lactation.
