# Premiere in Lucerne

A light extravaganza in the city of lights

Between 10 and 20 January 2019, Lucerne is being transformed into a place of scintillating encounters. Bringing light and warmth to the city in winter, Lucerne's very first Lilo Festival of Light presents Swiss and international artists showcasing light in all its fascinating facets.

On a winter's walk through Lucerne between the hours of 6 and 10 p.m., discover the luminous artworks installed in squares, tourist attractions and alleys in the Old Town and dotted around the bay. The glittering highlight of the Lilo is the Genesis light show in the Hofkirche (Church of St. Leodegar).

**The new Lilo – Light Festival Lucerne is bringing light and warmth to the city. I'm looking forward to seeing the Old Town in a new light thanks to the numerous installations.**

## DIRECTIONS

For your convenience, there are regular, direct train connections to/from all major Swiss towns and cities. We recommend the use of public transport. The tour can be started from the station.

Lucerne is also easy to get to by car, with road/motorway connections from Zurich, Bern and Basel as well as the whole of Central Switzerland and the Bernese Oberland. To help keep traffic flowing smoothly, please follow the signs to the official car parks.

## ACCOMMODATION

Combine your visit to Lilu with a stay of one or more nights in Lucerne. The largest selection of accommodation can be found at:

📍 [www.luzern.com/hotel](http://www.luzern.com/hotel).

Visitors staying the night receive the Lucerne Visitor Card, which gives them free access to buses and trains throughout tariff zone 10 in the city of Lucerne, as well as a range of discounts for cableways and mountain railways, museums and excursions in the Lake Lucerne Region.

## GASTRONOMY

Enjoy a break and warm up in one of the many restaurants in Lucerne's Old Town. For ideas, visit:

📍 [www.luzern.com/restaurant](http://www.luzern.com/restaurant).

## TIPS

- Dress warmly; winter footwear is also recommended.
- The city benefits from public toilets as well as restaurants, etc., offering toilet facilities under the "nette Toiletten" scheme.
- Further information is available from the festival office at the tourist information centre in Lucerne railway station.

# Lucerne, the city of lights?

10

Lucerne has been known as the "city of lights" since the late Middle Ages. The Lucerne chronicler Diebold Schilling claimed that the city acquired its name of Lucerne "on account of the light": according to legend, a light-bearing angel showed the first inhabitants of Lucerne the place where they should erect a chapel dedicated to Saint Nicholas. This is where the Hofkirche now stands. Others believe the name "Lucerne" to be derived from fishing and the city's location on the lake: "Luciaria" means "a shoal of pike".

Joseph Moser, S. Barbara Holzmeyer.

Als ein Stadt kam hier zu stehen  
War Bilt nächst ein Licht zu sehen

## Plan Lumière Lucerne

Light or fish – both these themes run through Lucerne to this day. The “Plan Lumière” creates a unique evening effect every day according to the principle of less is more. The use of light in exactly the right places improves the quality of time spent in Lucerne by letting it radiate gently onto the familiar squares and buildings of the Old Town.

# Welcome Lilu

Artist

Welcome to the first edition of Lilu Light Festival Lucerne 2019!

The historic archway of the railway station will be lit and show all visitors the way.

For the first time, the Light Festival Lucerne will glow throughout the city of lights. Soft lights envelop the squares of the city, shimmer over the water and move over glacier-rocks to the beat of music. An interactive snow globe will come to life. Light artists will show their art at various locations and invite visitors to interact with the installations.

We are very proud to present local, national and international artists. Let yourself drift through the streets and squares and be guided by the lights of art.

The artistic director and Lilu team

LOCATION: Bahnhofplatz

Everyone is invited to step in front of the empty projection screen to be captured by a camera and subjected to 4-fold mirroring: amazing effects are created and projected directly on and behind the people – a stunning installation for all ages, allowing people to see themselves in a whole new light and feel like in a super-sized selfie.

The amorphous body of light is recognisable from afar; its presence inspires the beholder to put everyday life on hold for a few minutes. On the one hand an unfamiliar object, on the other a meeting place. The installation offers an impression of lightness as it hovers above the beholder. It enhances the large square and transforms it.

Our installation removes the inscription from its place (the Lion Monument) and omits the first word (Helvetiorum). As a result, we're addressing all those who are "faithful and brave". A rotating cylinder with its own poetic text creates projections onto Mühlenplatz, plunging the immediate surroundings into deep blue.

We see our works as defining and crossing the boundaries between images, space and urban or natural contexts.

At the same time, their surfaces should be seen as an expression of visual poetry, referencing the history of art and literature.

Lucerne attracts more tourists than virtually any other city in Switzerland. Naturally, visitors are used to being the beholders, and the city the beholden.

But what if their gaze were to be returned? A statue awakes. It opens its eyes and looks directly at the beholder. All of a sudden, one-way communication has turned into a dialogue that explores interesting topics.

Tall and strong. Lifeless creatures? But they breathe. And if you place your hand on them you can feel warmth. You can feel blood flowing through. They live longer than we do. We cannot survive without them. But they can live happily without us.

Tall and strong. They have been here long before me and you. And they will be here long after me and you. How would it be like to be one? To be... a tree.

## JARI MATSI & JUDITH PARTS

Nerd Studio is a creative platform for artists in the visual-auditive art field. It was created by Estonian artists Judith Parts (sound) and Jari Matsi (light and multimedia) in 2016 in a small town called Viljandi. Its main focus is to incorporate and mix different mediums and technologies. Nerd Studio creates work where technology is used in a playful way.

Passing through all the gates at the same time – a challenge that can only be mastered as a team.

Together we have the potential to realise visions that would be unattainable alone. The installation “åben” (Danish for open) lets the beholder experience the concept of collectivity in a fun way and shows visually how wonderful it is to collectively overcome a challenge.

A composite of fluorescent, semi-organic, semi-synthetic aquatic organisms. Technical progress is allowing us to fundamentally influence the mechanisms of evolution. Where is this trend taking us? The installation plays with the boundary between the natural and the artificial. A boundary that's becoming increasingly blurred due to technical progress, and that will probably disappear completely in the near future.

Lose your way deep in Lucerne's Old Town and the alleys become narrower, the lights weaker and the harsh January cold starts to bite. The atmosphere has something mystical about it – barely tangible – shy and invisible in daylight. Search at night in the winding darkness of the city, however, and it will show itself to you. Come closer, and out of the darkness magnificent light and warmth reveals itself: the light of Lucerne.
